

Forms 1.0	Forms 2.0	Status	OCA Priority	OCP Priority
Alignment towards left	Alignment at center	Observation		
Default length of the box for (options) concepts	Dynamic length of box for concepts	Observation		
Concept selection does not modify the UI	Concept selection modifies the UI	Observation		
Spacing between concepts is less	Spacing between concepts is more	Observation		
Description for concept - Can be displayed as bold, italic, into a new line	None of these features are available with description	Yet to pick		
If I want to see description for multiple concepts then I can see them as the UI is adjusted accordingly	The description overlap each other so if I want to view all descriptions at once it might not be possible as the UI does not adjust automatically	Yet to pick		
During form import from local to QA the short names are reflected	During form import from local to QA the short names are not reflected. We manually have to set the short names	Yet to pick		
During form import special characters like " - : % " are supported	During form import special characters like " - : % " are not supported	Yet to pick		
			<p>1=Lack of conversion 2=Bacteriological reversion after conversion to negative 3=Evidence of additional acquired resistance to fluoroquinolones or second-line injectable drugs 4=Adverse drug reactions 5=Other</p>	
			<p>1=Lack of conversion, 2=Bacteriological reversion after conversion to negative, 3=Evidence of additional acquired resistance to fluoroquinolones or second-line injectable drugs, 4=Adverse drug reactions, 5=Other</p>	
			<p>Total number of treatment days in the month (depends on whether treatment is given 6 or 7 days per week and when the treatment was started)</p> <p>Number of days patient did not take any of the prescribed treatment. All TB drugs are missing</p> <p>Number of days patient did not take all prescribed TB drugs- Some TB drugs are missing but not all</p>	<p>Total number of treatment days in the month (depends on whether treatment is given 6 or 7 days per week and when the treatment was started)</p> <p>Number of days where treatment was not prescribed by the clinician during this month (Sunday should not be counted if day off treatment)</p> <p>Number of days patient did not take any of the prescribed treatment. All TB drugs are missing</p> <p>Number of days patient did not take all prescribed TB drugs- Some TB drugs are missing but not all</p>

No additional spaces added during export of forms for concepts having numeric values in concept name	During form export if we have a number in a concept name then it adds an additional space in the json automatically. After import of form we get an error of concept not found as it is looking for a concept without the additional space	Yet to pick			
Add more for forms is supported	Add more for forms is not supported	Yet to pick			
Form conditions work with add section	Form conditions do not work with add section	In progress, OCA			
Groovy works with add section	Groovy does not work with add section	Fixed, OCA			
Add more for a section is clearly displayed on UI as "Add Section"	For add section we only have a "+" sign on the section	Observation			
After i fill all the form conditions in an observation form and i save the form all the form conditions are filled and visible	The form condition that is filled at the end is only visible after the form is saved and all the previous conditions are not visible	Fixed, OCP			
When a form condition is enabled and i select Option A initially for the form condition but before saving the form if i select Option B then Option A is automatically and option B is selected and saved	When a form condition is enabled and i select Option A initially for the form condition but before saving the form if i select Option B then both Options A and B are selected and saved	Fixed, OCP			
Display month & year config can be done	Display month & year config cannot be done	Observation			
CSV upload takes care of all the fully specified names and short names	On editing a published form the shortnames are not getting reflected on the new version of the form	Fixed, OCP			
Concise text is supported - The length of a text box can be reduced	Concise text is not supported - The length of a text box cannot be reduced
